In order to make the assembly of this Traditional ADA Bench easier while going through the assembly process the board positions are numbered and will be referenced in later steps.

Step #1:

Stand (1) One bench end (Part B) upright and place (1) One bench board (Part A) on position 1 being sure to align the pre-drilled holes to the pilot holes in the bench end. After the holes are properly aligned, fasten with (1) One #12 x 3" Flat Head Phillips Screw in the top pre-drilled hole.

Note: Do not tighten screw completely. This will be done in a later step.

Step #2:

Stand the other bench end (Part B) upright and place the bench board (Part A) already attached to the first bench end, on position 1 being sure to align the pre-drilled holes to the pilot holes in the bench end. After the holes are properly aligned, fasten with (1) One #12 x 3" Flat Head Phillips Screw in the top pre-drilled hole.

Note: Do not tighten screws completely. This will be done in a later step.

Step #3:

Align bottom pre-drilled holes to the pilot holes in the bench end (Part B). After the holes are properly aligned, fasten with (1) One #12 x 3" Flat Head Phillips Screw per hole.

Note: Be sure to tighten screws completely after this step.

Step #4:

Place a Mounting Plate (Part G) with the countersink's facing up on each bench end (Part B). Being sure to align the pre-drilled holes to the pilot holes in the bench end. Use (1) One #12 x 2" Flat Head Phillips Screw per hole to fasten.

Step #5:

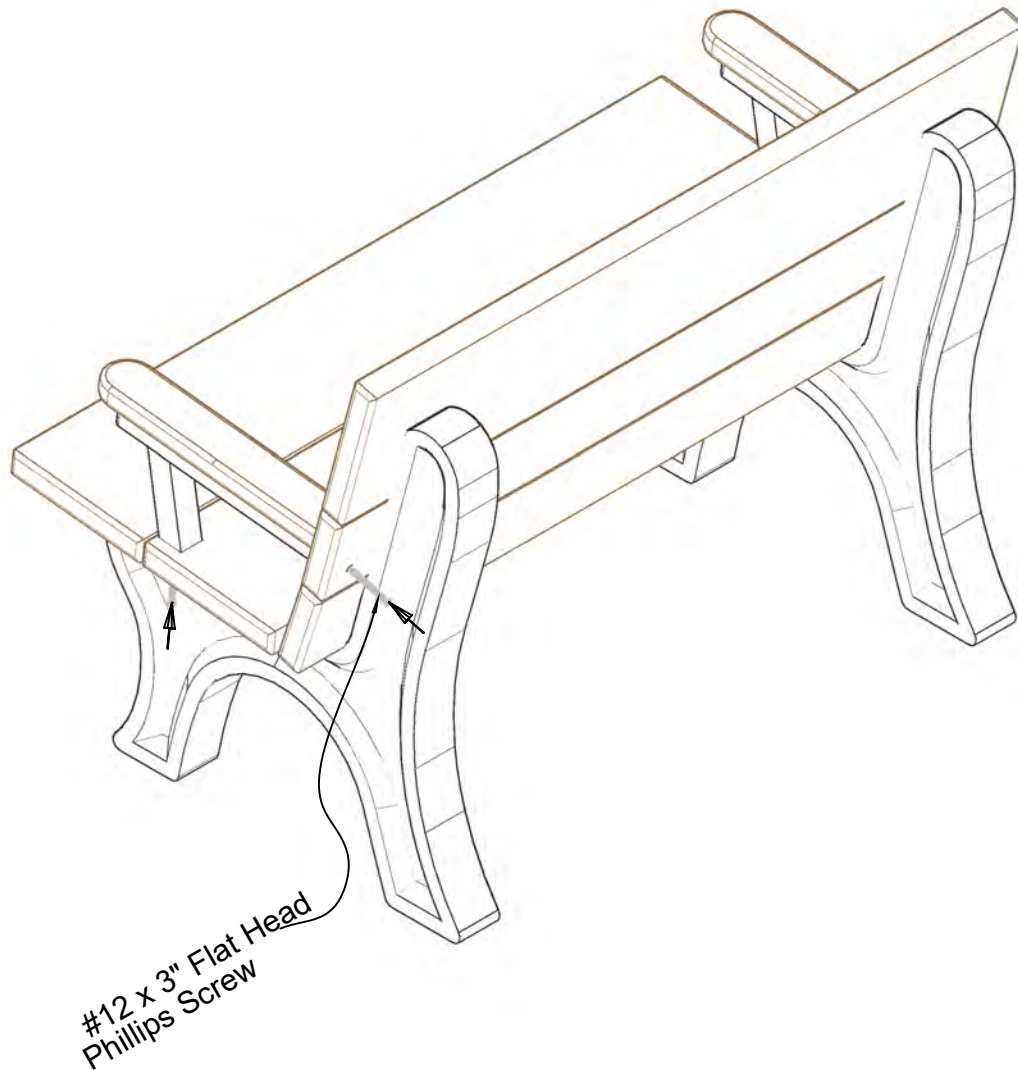

Repeat Steps 1 - 3 to attach bench board (Part C) on position 2 with arm holes towards bottom of board and bench board (Part E) on position 3.

#12 x 2" Pan Head
Phillips Screw

Step #6:

Lay bench on its back. Attach bench board w/ arm holes (Part H) on position 4 with arm holes facing front of bench and bench board (Part F) on position 5. Be sure to align the pre-drilled holes in the mounting plates to the pilot holes in the bench boards. Use (1) One #12 x 2" Pan Head Phillips Screw per hole to fasten.

Step #7:

Position the bench arms (Part D) as shown above. Align the pilot holes to the pre-drilled holes in the bench board w/ arm holes. After the holes are properly aligned, fasten with (1) One #12 x 3" Flat Head Phillips Screw per hole.
