

RC-KD SIGN INSTALLATION

Step 1: Place the sign panel on the back edge of the can

Step 2: Apply enough pressure on the top of the sign panel to seat it onto the can

Step 3: Place the lid onto the can, adjacent to the sign panel

Step 4: Bend the top of the sign panel back slightly to open the slot for the lid to enter*

Step 5: Fully assembled unit. Simply slide your signage in to the panel

*The sign panel doesn't bend as much as it looks in the photo. If the lid doesn't drop in, it will only require a little assistance and slight pressure to enter into the slot.
